

MICHELIN® MEGAXBIB®

SUPER VOLUME HIGH FLOTATION RADIAL FOR HARVESTERS AND FLOATER

When flotation and soil protection are needed, MICHELIN® MEGAXBIB® radials help carry heavy loads in the field with minimal risk of rutting and compaction.

ULTRA-LOW SOIL COMPACTION

- The MICHELIN® MEGAXBIB® is an excellent choice for situations where flotation and reduced compaction are critical.

IMPRESSIVE LOAD CARRYING CAPACITY

- A huge footprint and extra-large air chamber combined with a special casing design allow the MICHELIN® MEGAXBIB® to carry extremely heavy loads at relatively low pressures.

BROAD FLAT FOOTPRINT – EXCELLENT GROUND PRESSURE DISTRIBUTION

- A flat stable tread spreads the load evenly across the footprint, helping to maximize flotation and minimize soil compaction.

EXCEPTIONAL COMFORT

- Ultra-low pressures and super-flexible sidewalls give the MICHELIN® MEGAXBIB® a soft comfortable ride, with surprising stability and handling on the road.
